- Tabletop charging station included

Controller controlCUE-one

- Ethernet IP enabled, onboard real time clock
- Ports: IP, bi-directional serial, IR/serial, general I/O,s relays
- Enclosure for desktop, rack and wall installation

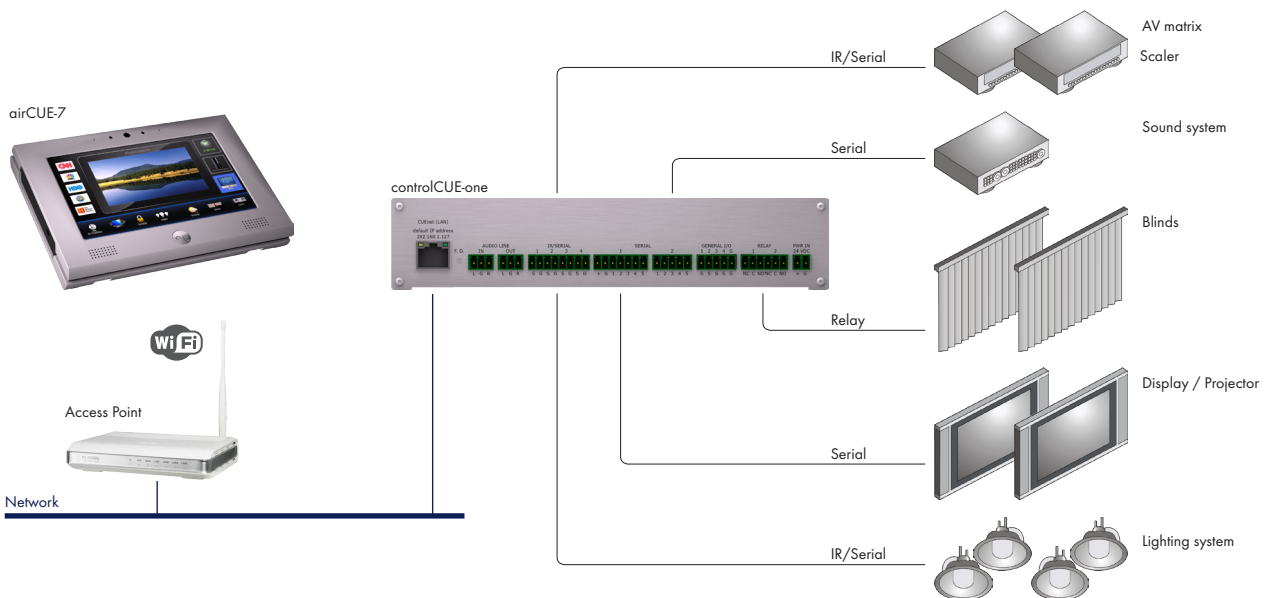

Description

The Elite-C1-7-wifi is bi-directional wireless touch panel control system. This package is flexible enough to be the perfect control solution in small to medium sized applications - meeting rooms, boardrooms, conference facilities and home theatre applications. The package includes the airCUE-7 color touch panel incl. tabletop charging station, standard Wi-Fi Access Point, controlCUE-one controller and accessories.

The 7" diagonal touch-sensitive active-matrix LCD panel caters to the full integration of lifestyle as well as work style. It combines functionality such as multimedia integration, lighting automation, security monitoring, entertainment integration, and meeting & presentation control.

The standard Access Point links the wireless touch panel to the controller. Control ports of controlCUE-one controller include bi-directional serial channels, serial and infrared outputs, general I/Os and low voltage relays. IP enabled products can be controlled using Ethernet port. IR codes capturing and receiving is provided by internal IR sensor. The controlCUE-one keeps date and time with its on-board real time clock and thus allows for a wide variety of distributed intelligence scheduling applications. Built in web pages allows for unit setup through a standard web browser.
