

iCUE-standard

DESCRIPTION

This software enables to use any Apple iOS device (iPad®, iPhone® or iPod® touch) as a Cue System control panel. It is a suitable addition to CUE control panels.

The GUI application has to be designed using standard programming tool - Cue Visual Composer, where effective application preparing is achieved by visual programming approach with drag and drop, advanced editing technique IntelliSense, export and import of ready to use pieces of program and more.

Communication between the control panel device and control system is based on Wi-Fi communication using CUEnet2 protocol.

MAIN FEATURES

- Apple iOS runtime for XPL2 applications
- Any iPad®, iPhone® or iPod® touch can be used as a Cue System control panel
- Compatible with Apple iOS 5.0.1 and higher
- Application designed with Cue Visual Composer
- Application upload directly from Cue Visual Composer
- Ethernet wireless communication between the panel and the control system
- Communication with Cue System units using CUEnet protocol

SPECIFICATIONS

Operating system
Apple iOS 5.0.1 and higher

Application upload
Directly from Cue Visual Composer
Using configuration window

Communication
Wi-Fi
CUEnet2 protocol

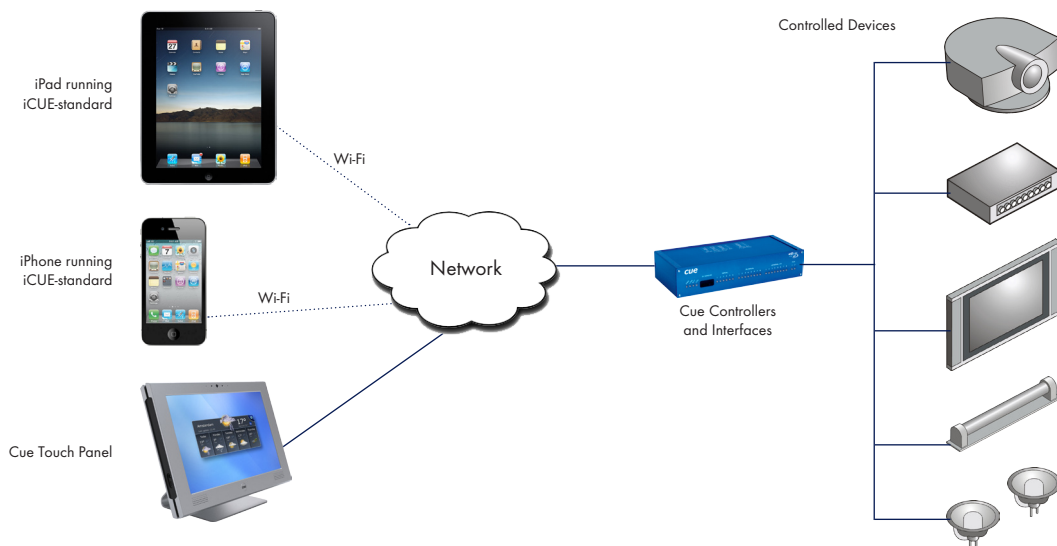

ORDER INFORMATION

Product code CS0428

Purchase and registration

1. Download iCUE-standard from Apple AppStore and install it on control panel target device.
2. Send order for CS0428 to sales@cuesystem.com.
3. Start registration procedure after receiving the order confirmation and license key. For more details about registration procedure see iCUE manual.
